

ANAND HOSPITAL

Run by: ANAND NIROGDHAM HOSPITAL PVT.LTD.

Message from MD's Desk

'Anand' the name itself signifies happiness, delight, joy, contentment and relaxation, therefore, we make sure that this state of total bliss is experienced by each and every patient, who comes in contact with us, making all their worries disappear.

A human life is uncertain, and unpredictable. It not only grows and blossoms but also deteriorates with time. Since 2007, here at Anand Hospital we serve, save, heal and take care of your pain with science and compassion.

Our highly qualified professionals with multidimensional experience are devoted towards the utmost care of every single patient, providing international standard treatment facilities at affordable costs.

We with our skillful nursing care believe in caring not just curing the patients.

Knowledge, Technology and Hope are roots of this institution.

HARIOM ANAND
Managing Director
Anand Hospital

Anand hospital is widely spread across 1, 20,000 sq.ft. area with beautiful exteriors.

The institute is equipped with 300 beds and over 90 critical care beds.

Anand is one of the first comprehensive, multi specialty setup in western U.P. with latest state-of-the-art equipments for both diagnostic and therapeutic services under one roof.

Our highly qualified professionals having multi-dimensional experience are devoted to specialized patient care with 24 hrs availability.

Striving for excellence with personalized care, we provide efficient, patient oriented services in a friendly and healthy environment at an affordable cost.

MD, DM

KIDNEY TRANSPLANTATION UNIT

At Anand Hospital the department of kidney transplantation is committed to provide time, effort and resources required to make your transplant a success. Our services extend far beyond the operating room. In other words we look after and monitor our patients to ensure their lives are functioning smoothly after the successful kidney transplantation. This division provides kidney transplantation of patients suffering from end stage kidney disease. After the initial evaluation is done to know the cause, its severity, its reversibility (if any) and co-existing conditions, the patients are then advised renal replacement but if the patients have End stage kidney Disease they are advised by the doctors to opt for either life-long dialysis or kidney transplantation and as per their decision our outstanding team of doctors take care of everything right from the beginning till the patient starts recovering.

We provide cutting edge care with highest quality of outcome.

OUR SPECIALIST

Dr Anil kapoor

MS (General Surgery), FCCP, FAIS

DEPARTMENT OF BARIATRIC SURGERY

(Weight Loss Surgery)

We at Anand Hospital have taken the lead in this area for the first time in Western U.P. We are pleased to inform the addition of minimal invasive weight loss surgery in our hospital at a very affordable cost. We have done nearly a dozen cases and have been rewarded with good results.

Our team of specialists besides a highly trained surgeon and physician include dieticians, physiotherapists and counselors. A detailed pre-operative assessment regarding suitability for surgery is done along with extensive counseling. This prepares the patient and family for the lifestyle and dietary adjustments to be made in the post surgical period.

Morbid obesity is a life threatening disease that produces multiple co-morbidities. With advancement in minimally invasive techniques the acceptance of bariatric surgery has increased. The number of obese persons in our country is increasing

day by day. Hence, we are now focusing on treatment of morbid obesity.

Bariatric surgery (weight loss surgery) includes a variety of procedures performed on people who are obese. Weight loss is achieved by reducing the size of the stomach with a gastric band or through removal of a portion of the stomach.

Long term studies show that the procedures cause significant loss of weight, recovery from diabetes, improvement in cardiovascular risk factors, and a reduction in mortality of 23% from 40%.

OUR SPECIALIST

Dr. Rajesh Kapoor
MS, MCh

DEPARTMENT OF PULMONARY AND RESPIRATORY MEDICINE

The Division of Pulmonary and Respiratory medicine at Anand has highly trained group of doctors and nurses who take care of the diseases related to lungs and breathing. We provide appropriate clinical evaluation, diagnosis and treatment services to our patients with health problems such as: Multi Drug Resistant Tuberculosis, interstitial Lung Disease like IPF & Sarcoidosis. DEPARTMENT OF DIETETICS

The Department of Dietetics and Food & Beverage at Anand Hospital consists of registered dietitians and culinary professionals who provide inpatient and outpatient nutrition services. They prepare healthy, nutritious food for the hospital patients and staff. Dietitians work with many clinical areas and departments to ensure the best available nutritional care at Anand Hospital. Our culinary experts provide various carefully prepared meals and snacks for patients, visitors and staff every day.

Outpatient Services

Nutrition experts from the Department of Dietetics aid the people with management of specific dietary needs in many different areas, including cardiac care, diabetes, childhood and adult obesity. They also offer nutritional care and counsel about lifestyle maintenance and good nutrition, like:

- Eating well when dining out

- Planning healthy meals at home
- Feeding people at home with different nutritional needs
- Heart-healthy eating

Inpatient Services

Good nourishment is a key component of recovering from surgery or illness.

The Department of Dietetics provides nutritional care and advice to patients while they are in the hospital and after they are discharged.
